Interview Summary	Application No.	Applicant(s)	
	10/727,322	CHAN ET AL.	
	Examiner	Art Unit	
	Shanto M Z Abedin	2136	

All participants (applicant, applicant's representative, PTO personnel):

- (1) Shanto M Z Abedin. (3) _____
(2) Francis Lammes. (4) _____

Date of Interview: 12 September 2007.

Type: a) ☒ Telephonic b) ☐ Video Conference

c) ☐ Personal [copy given to: 1) ☐ applicant 2) ☐ applicant's representative]

Exhibit shown or demonstration conducted: d) ☐ Yes e) ☒ No.

If Yes, brief description: _____.

Claim(s) discussed: 1-27.

Identification of prior art discussed: 35 USC 101 and 102 rejections.

Agreement with respect to the claims f) ☐ was reached. g) ☒ was not reached. h) ☐ N/A.

Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: See Continuation Sheet.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)

THE FORMAL WRITTEN REPLY TO THE LAST OFFICE ACTION MUST INCLUDE THE SUBSTANCE OF THE INTERVIEW. (See MPEP Section 713.04). If a reply to the last Office action has already been filed, APPLICANT IS GIVEN A NON-EXTENDABLE PERIOD OF THE LONGER OF ONE MONTH OR THIRTY DAYS FROM THIS INTERVIEW DATE, OR THE MAILING DATE OF THIS INTERVIEW SUMMARY FORM, WHICHEVER IS LATER, TO FILE A STATEMENT OF THE SUBSTANCE OF THE INTERVIEW. See Summary of Record of Interview requirements on reverse side or on attached sheet.

Examiner Note: You must sign this form unless it is an Attachment to a signed Office action.

Examiner's signature, if required

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

35 USC 101 rejections: Proposed amendments of claim 10-18 are discussed. The applicant's representative was told that limitations such as "a computer program product" would raise possible future 35USC 101 rejection issue, and further amendments to the claims are needed to overcome/ avoid future 35 USC 101 rejections.

35 USC 102 rejections: The applicant was told that amendments would be considered, and a decision about the application would be made after further search once the amendments were formally received.

Copy of the Applicant's Interview request form and proposed amendments are enclosed with this interview summary .

Attorney Docket No.: CA920030029US1

AGENDA FOR TELEPHONE INTERVIEW

I am requesting a telephone interview on September 18th, 2007 at 10:00 am CT.

Please consider the following topics for discussion:

- Applicants would like to discuss a claim amendment to overcome the 35 U.S.C. § 101 rejection of claims 10-18. Applicants are **proposing** an amendment that recites “A computer program product having a computer readable medium tangibly embodying computer executable code for managing multiple user identities for a user of an electronic commerce (e-commerce) site defined using the plurality of security domains, wherein the computer executable code, when executed on a computing device, causes the computing device to:”
- Applicants would like to discuss the rejection of claims 1-27 under 35 U.S.C. § 102(e). **Proposed** claim amendments are attached. Applicants would like to discuss that Wood fails to teach selecting a session from a plurality of sessions persisted for the user based on the determined security domain; and reusing the selected session for the user automatically in accordance with the determined security domain, the selected session being associated with a user identity and a role, the user identity and the role together indicating privileges for invoking operations of the e-commerce site in the determined security domain.

The Examiner is invited to call at the below-listed telephone number to confirm or reschedule the requested telephone interview.

Francis Lammes

AGENT FOR APPLICANTS

Proposed claim amendments:

1. (Currently amended) A method for managing multiple user identities for a user of an electronic commerce (e-commerce) site, the method comprising:
defining the e-commerce site as ~~one or more~~ a plurality of security domains; and
in response to a user's request to invoke an operation of the e-commerce site:
determining a ~~[[one]]~~ security domain of the ~~one or more~~ plurality of
security domains to which the operation relates;
selecting a session from a plurality of sessions persisted for the user based
on the determined security domain; and
~~performing one of a) creating a session and b) reusing~~ [[a]] the selected
session for the user automatically in accordance with the
determined security domain, ~~[[said]]~~ the selected session being
associated with a user identity and a role, the user identity and the
role together indicating privileges for invoking operations of the e-
commerce site in ~~at least~~ the determined security domain; ~~and~~
~~persisting said session for reuse.~~
2. (Currently amended) The method of claim 1 comprising invoking ~~[[said]]~~ the
requested operation with ~~[[said]]~~ the user identity and role of ~~[[said]]~~ the selected session.
3. (Currently amended) The method of claim 2 wherein the selected session
comprises information indicating at least one of: the user preference's for invoking
operations at the e-commerce site; the user's preferences for invoking operations at ~~[[at]]~~
least the determined security domain; and a security signature for authenticating the
selected session information.
4. (Currently amended) The method of claim 1 comprising evaluating the requested
operation to determine an operation type and wherein ~~[[said]]~~ the step of ~~performing~~
reusing is performed in accordance with the operation type.
5. (Canceled)

6. (Currently amended) The method of claim 4 wherein ~~[[said]]~~ the user identity is associated with an identity type for permitting the invocation of operations; wherein ~~[[said]]~~ the method comprises receiving the user's request in association with ~~one or more~~ the plurality of sessions persisted for the user and retrieving ~~[[a]]~~ the user identity for the determined security domain from ~~said one or more~~ the plurality of sessions; and wherein ~~said performing the reusing~~ is performed in response to the identity type of the retrieved user identity.

7. (Currently amended) The method of claim 1 wherein ~~[[said]]~~ the step of ~~persisting~~ selecting comprises providing one or more cookies defining the selected session to the user for associating with a subsequent request.

8. (Currently amended) The method of claim ~~[[6]]~~ 7 wherein the cookies comprise an authentication cookie and a session cookie; and wherein the method comprises authenticating the user's request.

9. (Currently amended) The method of claim 1 comprising:
defining each of the ~~one or more~~ plurality of security domains as a hierarchy of organizations and assets owned by the organizations; and
wherein ~~[[said]]~~ the determining a one of the ~~one or more~~ plurality of security domains to which the operation relates comprises evaluating the user's request in accordance with the hierarchy.

10. (Currently amended) A computer program product having a computer readable medium tangibly embodying computer executable code for managing multiple user identities for a user of an electronic commerce (e-commerce) site defined using ~~one or more~~ the plurality of security domains, wherein the computer program product comprising executable code, when executed on a computing device, causes the computing device to ~~[[for]]~~:

in response to a user's request to invoke an operation of the e-commerce site:

determining a ~~[[one]]~~ security domain of the ~~one or more~~ plurality of
security domains to which the operation relates;
selecting a session from a plurality of sessions persisted for the user based
on the determined security domain; and
~~performing one of a) creating a session and b) reusing~~ [[a]] the selected
session for the user automatically in accordance with the
determined security domain, [[said]] the selected session being
associated with a user identity and a role, the user identity and the
role together indicating privileges for invoking operations of the e-
commerce site in ~~at least~~ the determined security domain; ~~and~~
~~persisting said session for reuse.~~

11. (Currently amended) The computer program product of claim 10 comprising
code for invoking [[said]] the requested operation with [[said]] the user identity and role
of [[said]] the selected session.

12. (Currently amended) The computer program product of claim 11 wherein the
selected session comprises information indicating at least one of: the user preference's for
invoking operations at the e-commerce site; the user's preferences for invoking operations
at [[at]] least the determined security domain; and a security signature for authenticating
the selected session information.

13. (Currently amended) The computer program product of claim 10 comprising
code for evaluating the requested operation to determine an operation type and wherein
[[said]] the code for ~~performing~~ reusing is adapted to be performed in accordance with
the operation type.

14. (Canceled)

15. (Currently amended) The computer program product of claim 13 wherein [[said]]
the user identity is associated with an identity type for permitting the invocation of

operations; wherein ~~[[said]]~~ the computer program product comprises code for receiving the user's request in association with ~~one or more~~ plurality of sessions persisted for the user and retrieving ~~[[a]]~~ the user identity for the determined security domain from said ~~one or more~~ the plurality of sessions; and wherein ~~[[said]]~~ the code for ~~performing~~ reusing is adapted to be performed in response to the identity type of the retrieved user identity.

16. (Currently amended) The computer program product of claim 10 wherein ~~[[said]]~~ the code for ~~performing~~ reusing comprises code for providing one or more cookies defining the selected session to the user for associating with a subsequent request.

17. (Original) The computer program product of claim 16 wherein the cookies comprise an authentication cookie and a session cookie; and wherein the computer program product comprises code for authenticating the user's request.

18. (Currently amended) The computer program product of claim 10 comprising code for:

defining each of the ~~one or more~~ plurality of security domains as a hierarchy of organizations and assets owned by the organizations; and

wherein ~~[[said]]~~ the code for determining a one of the ~~one or more~~ plurality of security domains to which the operation relates is adapted to evaluate the user's request in accordance with the hierarchy.

19. (Currently amended) A system for managing multiple user identities for a user of an electronic commerce (e-commerce) site defined using ~~one or more~~ a plurality of security domains, the system comprising:

an identity manager component configured to, in response to a user's request to invoke an operation of the e-commerce site:

determine a ~~[[one]]~~ security domain of the ~~one or more~~ plurality of security domains to which the operation relates;

select a session from a plurality of sessions persisted for the user based on the determined security domain; and
~~perform one of a) creating a session and b) reusing reuse~~ [[a]] the selected session for the user automatically in accordance with the determined security domain, [[said]] the selected session being associated with a user identity and a role, the user identity and the role together indicating privileges for invoking operations of the e-commerce site in at least the determined security domain; and
~~persist said session for reuse.~~

20. (Currently amended) The system of claim 19 wherein the identity manager component is adapted to invoke [[said]] the requested operation with [[said]] the user identity and role of [[said]] the selected session.

21. (Currently amended) The system of claim 20 wherein the selected session comprises information indicating at least one of: the user preference's for invoking operations at the e-commerce site; the user's preferences for invoking operations at [[at]] least the determined security domain; and a security signature for authenticating the selected session information.

22. (Currently amended) The system of claim 19 wherein the identity manager component is configured to evaluate the requested operation to determine an operation type and adapted to ~~perform said one of a) creating and b) reusing~~ reuse the selected session in accordance with the operation type.

23. (Canceled)

24. (Currently amended) The system of claim 22 wherein [[said]] the user identity is associated with an identity type for permitting the invocation of operations; wherein [[said]] the identity manager component is adapted to receive the user's request in association with one or more the plurality of sessions persisted for the user and retrieve

[[a]] the user identity for the determined security domain from ~~said one or more~~ the plurality of sessions; and wherein [[said]] the identity manager component is adapted to perform ~~said one of a) creating and b) reusing~~ reuse the selected session in response to the identity type of the retrieved user identity.

25. (Currently amended) The system of claim 19 wherein to ~~persist said~~ select the selected session [[said]] the identity manager component provides one or more cookies defining the selected session to the user for associating with a subsequent request.

26. (Currently amended) The system of claim [[26]] 25 wherein the cookies comprise an authentication cookie and a session cookie; and wherein the identity manager component authenticates the user's request.

27. (Currently amended) The system of claim 19 wherein the e-commerce site is defines each of the ~~one or more~~ plurality of security domains as a hierarchy of organizations and assets owned by the organizations; and wherein [[said]] the identity manager component is adapted to determine a one of the ~~one or more~~ plurality of security domains to which the operation relates by evaluating the user's request in accordance with the hierarchy.
